

CLIMATE CHANGE POLICY

Our company, with the aim of preventing climate change globally, commits to:

- Efficiently using natural resources, increasing recycling and recovery,
- Considering energy-efficient and environmentally friendly technologies in all processes from the design stage,
- Developing and implementing energy efficiency projects that will have a positive impact on climate change,
- Procuring products, services, and technologies that promote energy efficiency,
- Complying with current legal and other requirements related to the environment and energy,
- Continuously improving and enhancing environmental and energy performance,
- Taking necessary measures to reduce and eliminate activities with adverse environmental impacts,
- Periodically reviewing the set goals and objectives within this scope, and allocating resources to achieve these goals.
